Hydra-Enrich20

Hydra-Enrich20 is a natural soil conditioner, organic chelator and microbial stimulator that provides tremendous benefit to your soils and plants.

Hydra-Enrich20 is a premium source of humic and fulvic acids derived from fresh water leonardite ore. Hydra-Enrich20 can enhance soil fertility by increasing nutrient availability and improving soil cation exchange. Hydra-Enrich20 is especially useful on sand-based soils, where humic acid has been demonstrated to have positive effects on nutrient uptake and plant growth.

HydraSmart

Benefits:

- Enhances photosynthesis, root development and nutrient uptake
- Provides an oxidized carbon source
- Sequesters water, enabling better penetration into soil
- Chelates soil micros, increasing availability to the plant
- Increases CEC, improves low organic soils
- Reduces long-term soil compaction
